

Smart villages in Sweden

EMMA BERGSTRAND
LOCAL DEVELOPMENT SWEDEN

AN INTRODUCTION

Smart villages

- **EU-level**
 - NRN (National Rural Network) has sent participant to thematic workinggroup
 - LUS (Local development Sweden) has also done this
- **National level:**
 - NRN- put the working group in the bigger LEADER-group, but has not started the work yet
 - LUS – has been researching some local initiatives

Smart villages

- Local level
 - Has been working with this 4-ever?!
 - What is new?

Smart villages

- **Conclusion**

- Great confusion on all levels, but we are starting to see possibilities, especially with one project that has been going on, called active villages
- There is a need for inspiration and knowledge on village level
- We see possibility for LUS to act as a facilitator/ bridging from local level to national and international level, thus involving all 53 member LAGs

Smart villages

- Next steps
 - Are still to be taken...
